SUMMARY

Dedicated Frontend Engineer with 2 years of experience building and optimizing 25 high-performing production applications using React, Next.js, and TypeScript, serving 600–1,000 daily active users in enterprise environments. Passionate about architecting scalable, reliable frontend systems and tackling complex technical challenges, with experience in real-time architectures, shared infrastructure, and industrial integrations. Currently pursuing a Master's in AI Engineering, deeply driven to pioneer next-generation web applications at the intersection of frontend development and artificial intelligence.

SKILLS

- Languages:** JavaScript, TypeScript, Python (basic)
Frontend: React, Next.js, HTML, CSS, Material UI, Tailwind CSS
State & Data: TanStack React Query, Redux, Zustand
Forms & Validation: React Hook Form, Yup, Zod
APIs: REST APIs, WebSockets, SignalR
Architecture: Multi-zone Applications, Multi-repository Architecture, Feature-Sliced Design, Vertical Slice Architecture, Component Architecture, Shared Package Development
Practices: Agile, Scrum, Kanban, Code Review
Tools & DevOps: Git, Docker, Linux

LANGUAGES

- Persian** — Native
English — Professional Working Proficiency

PROFESSIONAL EXPERIENCE

MAM Broiler Integration — Morgh Ajdad Mazandaran

Frontend Engineer
09/2024 – Present | Babol, Iran

- **Migrated the frontend from a monolithic application to a multi-zone, multi-repository architecture**, implementing reverse-proxy routing and shared infrastructure across multiple enterprise applications while adopting **vertical slice architecture** to organize features around business capabilities and improve modularity and maintainability.
- **Developed and maintained 25 production applications** using React, Next.js, and TypeScript across ERP domains including production, slaughterhouse operations, logistics, farming, finance, procurement, HR, commerce, and user management.
- **Developed 6 shared internal NPM packages** for reusable components, layouts, icons, utilities, and common functionality, adopted across projects by 5 frontend developers.
- **Integrated 10 industrial weighing systems** with the ERP platform, handling device-specific communication protocols, encoding requirements, and production connectivity issues.
- **Spent 60 days on-site at industrial facilities**, diagnosing hardware/software integration issues and resolving production-critical problems with minimal disruption.
- **Built data-intensive enterprise interfaces** including complex tables, forms, dashboards, charts, timelines, and printing workflows.
- **Implemented real-time functionality using WebSockets and SignalR** for live data synchronization across enterprise applications.
- **Contributed across the full delivery lifecycle**, including Docker/Kubernetes deployments, CI/CD, Linux environments, and production troubleshooting with backend and operations teams.

COURSES

Complete React.js + Next.js + Redux

Udemy

JavaScript — Beginner to Advanced

Sabzlearn

Practical TypeScript

Sabzlearn

Professional Tech Lead Training

Maktabkhooneh

Machine Learning A-Z: AI, Python

Udemy
2026 – Present

EDUCATION

Master of Science in Artificial Intelligence Engineering

Mazandaran University of Science and Technology
2025 – Present

Bachelor of Science in Computer Engineering

Mazandaran University of Science and Technology
2021 – 2025
